This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the				
following limitations and conditions:				
of the waters of an underground source as heretofore granted under Permit 30261 is issued subject to the terms and conditions imposed in said Permit 30261 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times. No perforations shall be put in the production casing from ground level to 100 feet.				
The total combined duty of water under this permit and Permit 42881 shall not exceed 10.95 million gallons annually.				
The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not				
to exceed 0.22 cubic feet per second . but not to exceed

15. It is the intention of the applicants that the waters developed from this well, together with the well pursuant to application 42881 will not exceed .3 cfs diversion rate from each well or a total combined annual use of 10.95 million gallons. The two sources will be commingled to insure a firm and dependable source of supply. The water will be used for a restaurant, bar, gaming, and possibly a motel or condominium development. It is expressly understood that 90% or 2.7 cfs diversion rate and 985.5 million gallons annually associated with application 30621 shall remain unaffected by this application and application 42881.
